

## **DEFINITION OF TERMS OF MINIMUM QUALIFICATIONS:**

**technical inspection:** Conduct or witness oil, gas, or geothermal tests and/or operations. Review field results, production data, and remote imaging or sensing data (e.g., InSAR, LIDAR), for confirmation of compliance with specifications. This includes but not limited to reservoir analysis, step rate test, casing and pipeline pressure tests, mechanical integrity tests, blow out prevention tests, failure analysis, tank integrity, and cementing operation results.
